

Berger Chimney Pots

Enduring beauty & timeless performance

Architectural Copper Products from Berger

Copper and steel chimney pots from Berger deliver show-stopping style, improved fireplace performance and enhanced safety by keeping your chimney free from leaves & debris, animals and the elements.

An ideal alternative to heavy clay pots and unsightly steel caps, Berger copper chimney pots take your home's curb appeal to a whole new level.

Why use a chimney pot?

The taller the chimney, the better the draft (airflow). The added height of the chimney pot means that more smoke is pulled through and out of the chimney in less time, helping reduce soot buildup.

How does a Berger chimney pot work?

The patented vent system at the base of every Berger chimney pot is the key to improving airflow. Heavy, dense air enters through the bottom vents and pushes on the column of heated air flowing up through the pot, forcing it to rise faster — known as the "stack" effect. The added height of the pot also enhances performance by adding to the stack effect.

What makes Berger chimney pots beautiful?

Every copper chimney pot gets a factory-applied patina that results in a beautiful, gently aged appearance. Since each patina is hand mixed, every copper chimney pot has a unique, custom look. Steel chimney pots are coated with an attractive, durable, weather and fade-resistant copper-finish paint.

Berger now offers a complete line of architectural copper products custom-crafted to uniquely complement any home. Berger copper products add style, improve curb appeal and create lasting value. From robust gutter systems and roof components to stunning architectural products, Berger copper products deliver the perfect mix of value, form and function.

Berger Chimney Pot Specifications:

Berger chimney pots are designed to cover five types of flues, providing unparalleled continuity to the look of the home.

King Chimney Pot

Model: POTCPKI

With it's stately appearance, the King adds instant royalty to your home. This large chimney pot is ideal for tall chimneys and larger-scale homes.

Material: Copper Base: 24" octagonal
Inside Dim.: 22" Height: 47 1/4"
Weight: 45 lbs.

Bishop II Chimney Pot

Model: POTCPB12

A petite version of the Bishop, the Bishop II echoes the shape of standard clay pots at a fraction of the weight.

Material: Copper Base: 20" round
Inside Dim.: 18 1/4" Height: 38"
Weight: 26 lbs.

Pawn Chimney Pot

Model: POTCPPA

The smallest chimney pot in our line, the Pawn lends a custom, stylized look to smaller homes.

Material: Copper Base: 20 1/2" octagonal
Inside Dim.: 18 1/2" Height: 25 1/4"
Weight: 21 lbs.

Queen Chimney Pot

Model: POTCPQU

Appropriately scaled a bit smaller than the King, the Queen adds a regal element to any chimney.

Material: Copper Base: 20" octagonal
Inside Dim.: 18" Height: 41 1/2"
Weight: 42 lbs.

Knight Chimney Pot

Model: POTCPKN1

The strong lines of the Knight offer a unique look with a pyramid-shaped top. This model also works well for more-streamlined architecture.

Material: Copper Base: 21" square
Inside Dim.: 19" Height: 43 3/4"
Weight: 36 lbs.

Chimney Classics Square Chimney Pot

Model: POTALUZKN4-CPNY

Strong lines define this Chimney Classics pot. Value-added design elements make it an ideal match for most homes.

Material: Painted Steel Base: 21" square
Inside Dim.: 18 1/2" Height: 44 1/2"
Weight: 31 lbs.

Bishop Chimney Pot

Model: POTCPB1

The clean lines of the Bishop make it ideal for Mediterranean and contemporary-style homes.

Material: Copper Base: 26" round
Inside Dim.: 24" Height: 52 1/2"
Weight: 36 lbs.

Knight II Chimney Pot

Model: POTCPKN2

Like the Knight, the Knight II offers a solid, boxy finish that works especially well with Art Deco and Craftsman-style homes.

Material: Copper Base: 16" square
Inside Dim.: 14" Height: 38"
Weight: 20 lbs.

Chimney Classics Octagon Chimney Pot

Model: POTALUZBPA2-CPNY

Bold octagonal styling in the perfect size for smaller homes.

Material: Painted Steel Base: 24" octagonal
Inside Dim.: 22" Height: 35 1/2"
Weight: 25 lbs.
